Daily Message received of Mary, Rose of Peace, transmitted at the Marian Center of the Holy Spirit, Capilla del Monte, Cordoba, Argentina, to the visionary Friar Elías del Sagrado Corazón

The purification of the soul and of the whole being, according to the Law of Harmony, is similar to an inexhaustible spring of water.

This spring experiences permanent times of transformation, its rhythm is continuous, and, thus, each moment is indelible.

Water is chaste and pure, but the spring experiences its path of purification when it encounters all that which is superficial.

In this way, your hearts, which, in the image of God, are very pure, receive all the lessons to be able to grow and mature.

This spring experiences its transformations and you also experience the time of drought, the time of abundance and the time of balance, but you never stop purifying yourselves until you achieve peace.

I am that flow that leads you upon new paths. I am the Mother of all that has been created.

I thank you for responding to My call!

Who unites you to the principle of original purity,

Your Mother Mary, Rose of Peace
