DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF FIGUEIRA, TO THE VISIONARY SISTER LUCÍA DE JESÚS?????

Cry out for mercy for this world, because if your little eyes could see the reality of souls and the Kingdoms of Nature, your cry would be like the air, which without it you cannot be alive.

Child,

Cry out for the consciousness of the planet and feel in your heart that this world in which you live is not just a sphere of earth and water that floats in the universe. This planet has a spirit, a consciousness that sustains it, and it renounced being in other evolutions in the infinite Cosmos to sustain the Earth on which you place your feet.

The planet lives and feels in itself, in its spirit, what takes place on all the levels of life on Earth. The spirit of the planet suffers with souls and with the Kingdoms of Nature; it suffers from the ignorance and malice; it suffers from the indifference of hearts on their mission of bringing about the evolution of the life that dwells on it.

Child, what I tell you is not a fantasy; I reveal to you a mystery that humanity never wanted to accept or understand, for if it knew that the planet has its own spiritual life and that it suffers from everything that is lived on the surface, human life would have to be different.

Child, this beloved spirit of the planet is silent and will speak to the world through the movements of Nature, movements that will show humankind that human actions not only have physical consequences, but above all, also spiritual ones. And it is through these movements-which will be intense and painful to many-that some will awake and question the meaning of their own lives.

You who are reading this message and are aware of what I tell you, pray for the consciousness of the planet; unite with this mystery of higher life and discover, in your heart, that a part of your being lives within this spirit that sustains the Earth, and just as it feels and experiences the consequences of all actions, of all human feelings and thoughts, you too can feel them, and with this spiritual act of unity with Creation, give a sign of hope to the Father, Who created you so that you could live a perfect unity with all that is Life, in all dimensions.

I leave you this impulse so that, on your own, you dive into this mystery and unveil it. If you at least try to do it from your heart, you will understand many things, and by your act of love and unity with the consciousness of the planet, many imbalances will be avoided. Because, in spite of everything, child, it is still possible to experience a lesson based on love and on the awakening of the consciousness to higher life; just open your heart.

Your father and companion, the One who teaches you to live unity with the living consciousness of this beloved planet,

The Most Chaste Saint Joseph
