DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF FIGUEIRA, MINAS GERAIS, BRAZIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

The mystery of the human existence is greater than the renewal of Love and greater than a revelation of a new Love for the Divine Consciousness. In the essence of human beings, not only is their own history kept, the history of the evolution of life and of Creation, the history of God Himself, children, is kept there.

I know that what I am saying can seem somewhat distant from what you experience as creatures, but what truly happens is that human beings go through the experience of life on Earth and cannot discover who they are, let alone express it. Even the Son of God, being on Earth, could not express to beings the whole truth of His existence because not now nor at that moment were beings ready to know.

Revelations arrive at this time as impulses of Truth, but not as the unveiled Truth. The beings receive what they need in order to cross the threshold of these times and to start entering into divine time and reality.

Even if the moment of living the true expression of a human being has not arrived, you must at least know that it exists and through the simple attunement with the Truth you can now experience the tests of these times in a different way.

Let this inner legacy be felt. Let God make Himself felt within you. And by only knowing that something hidden is alive in your heart, it will now be sufficient to start a new cycle, in a new time.

Your Father and Friend,

The Most Chaste Saint Joseph
