Daily Message of Mary, Rose of Peace, transmitted in Villa de Dornes, Ferreira do Zêzere, Santarém, Portugal to the visionary Friar Elías del Sagrado Corazón

As silence penetrates the surface consciousness, the alliance between souls and God is established, and everything that is superficial and illusory begins to lose strength and vigor.

It is for this reason that when sacred silence is truly practiced, it not only benefits the soul but also the spirit of each being.

In this hour, a sacred silence can overcome great adversities and defeat great abysses of the planetary consciousness, because it acts as the first Law in all things.

When silence is experienced with love, devotion and harmony, it is an autonomous portal that opens over the consciousness of the planet and expands so widely that, without a battle, it releases the conditions or the projects of evil that were about to happen.

Sacred silence brings a renewal of life, and this influences the vows in a positive way, which also benefits the spiritual consecration of humanity.

Silence is an invisible and imperceptible instrument that roots out the human condition and acts upon the deepest planes of the being.

I thank you for responding to My call!

Who unifies you,

Your Mother Mary, Rose of Peace
