WEEKLY MESSAGE OF SAINT JOSEPH, TRANSMITTED AT MARIAN CENTER OF FIGUEIRA, MINAS GERAIS, BRASIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

So that humanity does not forget the importance of the Kingdoms of Nature, it must constantly be reminded of their existence, not only so that they may know how to contemplate a landscape, properly care for an animal, cultivate plants or respect the Kingdoms but, above all, children, so that they may understand the meaning of the evolution of life on Earth.

The ascension of life walks in unity. There is no human evolution if it does not walk in communion with the Kingdoms of Nature.

Each step taken towards the Purpose of humanity's existence also symbolizes a step for the Kingdoms of Nature.

Each capital energy overcome and transcended in the human consciousness also symbolizes the possibility that the Kingdoms may transcend their densest energies.

Each time a consciousness is willing to be closer to God, it carries planetary life with it, and with planetary life, comes the Kingdoms of Nature.

However, children, human consciousness at this time is immersed in a great mental, emotional and internal dispersion, which prevents it from focusing on its evolution if it is not constantly reminded of the essence of its life, its purpose, its goal.

I tell you all this to ask you to continue with the studies "For Love of the Kingdoms," so that you do not fail to remind yourselves and humanity about the importance of nature, and so that you may continue deepening into the spiritual meaning of contact with the Kingdoms.

In a time when nature agonizes, in which the Kingdoms manifest their imbalance through climate, suffering, natural disasters, it is very important, and I would even say primary, that beings learn to be in communion with nature, learn to generate balance in life, in the soil, in the waters, inside the animals; learn to collaborate with the balance of species, learn to restore life in the oceans and, above all, learn that their internal steps are reflected in all planetary life.

May you, in communion and by studying, encourage the love for the Kingdoms in one another by respect, service, peace and fraternal life.

This is a Higher Will of God for this time, because there will be no new life, no new Earth nor a new humankind if there is no love for the Kingdoms of Nature.

You have My blessing for this.

Your father and friend,

The Most Chaste Saint Joseph
